## EDUCATION

---

### Thapar Institute of Engineering and Technology

*Bachelor of Engineering in Computer Science*

Patiala, Punjab

Aug. 2024 – June 2027

### Thapar Polytechnic College

*Diploma in Computer Science*

Patiala, Punjab

Aug. 2021 – June 2024

## EXPERIENCE

---

### ELC

*Thapar University*

June 2025 – August 2025

*Patiala, Punjab*

- Built a Duplicate File Management Android App using Kotlin & Java to identify and remove redundant files via hashing algorithms
- Optimized background file scanning with multi-threading, reducing processing time by 40%
- Designed user-friendly UI and implemented secure storage handling compliant with Android Scoped Storage

### Six Weeks Summer Training

*Thapar Polytechnic College*

June 2023 – August 2023

*Patiala, Punjab*

- Gained hands-on experience with Python basics, including data types, control structures, functions, and file handling, helping build a strong foundation in programming
- Completed mini-projects such as a calculator, hangman problem, or data analysis tasks that improved problem-solving skills and understanding of real-world applications of Python
- Improved logical thinking, debugging techniques, and learned how to write clean, readable code following Python best practices

## PROJECTS

---

### RentEase | *React(Vite), Node.js, Express.js, MongoDB, JWT, Tesseract.js, Google Maps API*

- RentEase, a role-based rental platform with property listings, chat, booking, and calendar tracking
- Implemented chat-based rent negotiation, reducing conflicts by 90% and speeding up decisions by 40%
- Developed booking and notification workflow with status tracking and 100% overlap-prevention for property reservations

### TrustyTails | *EJS, Node.js, Express.js, MongoDB*

- Developed a two-sided pet-care marketplace connecting pet owners and caretakers
- Integrated a real-time chat system between owners and caretakers, reducing coordination time by 50%
- Built a responsive UI with an optimized card-based layout and fixed navbar

### Diabetes prediction & Model Performance Comparison | *Python, Pandas, Scikit*

- Improving model stability by 18% via nature normalization
- Trained and evaluated 10 ML models maintaining class balance using stratified sampling
- Validated performance using Precision, Recall, F1, ROC-AUC, Specificity and Hamming Loss for Reliability
- Optimized hyper parameters to maximize prediction accuracy, conducting grid search that improved F1-score

## TECHNICAL SKILLS

---

**Languages:** Java, Python, C, SQL (MongoDB), JavaScript, HTML/CSS, Kotlin

**Frameworks:** React, Node.js, Express.js, Rest API

**Developer Tools:** Git, VS Code, Visual Studio, Eclipse, Android Studio

**Libraries:** pandas, NumPy, Matplotlib, Scikit
